METHODOLOGY

Forbes' Real-Time Billionaires rankings tracks the daily ups and downs of the world's richest people. The wealth-tracking platform provides ongoing updates on the net worth and ranking of each individual confirmed by Forbes to be a billionaire. The value of individuals' public holdings are updated every 5 minutes when respective stock markets are open (there will be a 15-minute delay for stock prices). Individuals whose fortunes are significantly tied to private companies will have their net worths updated once a day. In cases where an individual owns a stake in a private company that accounts for 20% or more of his or her net worth, the value of the company will be adjusted according to an industry- or region-specific market index provided by our partners at FactSet Research Systems when available. A rotating cast of the five biggest winners and losers throughout the day is featured at the top of the page, followed by the complete list of billionaires ranked in order of net worth.
